

# U-connect 7 inch rear CAM adapter cable.

To properly connect a rearview camera to the Uconnect 7-inch all-in-one radio for the specified vehicle models, follow these detailed instructions:

## Required equipment

1. **Uconnect 7-inch all-in-one radio (with USB)**
2. **52-pin connector adapter cable with RCA camera input**
3. **NTSC rearview camera**

## Vehicle compatibility

- Iveco Daily 2019- (coding through diagnostic tools is required)
- Fiat Ducato 8 2020-
- Peugeot Boxer 2021-
- Opel Movano 2021

## Connection steps:

### 1. Connect the Camera:

- Ensure the rearview camera is NTSC format.
- Connect **camera power to 12V ACC (+15)** , not on reverse signal!!!
- Connect the RCA cable from the camera to the RCA input on the adapter.

### 2. Connect the Adapter Cable:

- Remove the 52-pins connector from the back of the radio.
- Connect the car radio plug with the adapter cable.

### 3. Connect the radio:

- Ensure all steps above have been done!
- **Last step:** Plug the new 52p plug of the adapter into the backside of the radio.

The sequence of the steps above are crucial to ensure that the radio can automatically detect the camera

## Vehicle-specific notes:

**Iveco Daily:** If the factory has not enabled the rearview camera feature, coding through diagnostic tools is required. Consult with a professional or use appropriate diagnostic equipment to enable the camera functionality.

**Fiat Ducato 8, Peugeot Boxer, Opel Movano:** Follow the general connection steps. Ensure all connections are secure and the camera is powered correctly.

**Final steps:**

- Test the camera by shifting the vehicle into reverse.
- If it's not working, disconnect the 52p plug directly behind the radio en connect it again. And if needed close the car for +/- 10 min. and try again.
